MOTOR MART - EXISTING GROUND FLOOR PLAN

BOSTON REDEVELOPMENT AUTHORITY

NOTES

THE STRUCTURE CONSISTS OF EIGHT FLOORS AND ONE BASEMENT LEVEL. FOR THE SAKE OF PRELIMINARY DESIGN IT CAN BE ASSUMED THAT COLUMN SPACING, STAIRCASES, ELEVATORS, RAMPS ETC. ARE CONSISTENT ON ALL FLOORS.

PRELIMINARY STUDIES FOR RENOVATION OF THE MOTOR MARY SHOW THAT THE MOST ECONOMICAL SYSTEM IS TO ELIMINATE THE TWO PAIRS OF SCISSORS RAMPS WHICH ARE SUB-STANDARD IN WIDTH, AND IN THEIR PLACE CONSTRUCT A SINGLE AND THUS WIDER SYSTEM OF RAMPS ON EITHER SIDE OF THE CENTRAL AREA.

PROJECT AREA: PARK PLAZA
